EXPERIENCE

4 YEARS+

OMISE (Thailand)

January 2026 - Present

Software QA Engineer

Omise Unity Project:

- **OMISE** acquired a USA based company “Merchant E”. This project is a merger between two payment systems. As a QA I am testing the Data Migration Test, SSO integration between two platforms etc.
- Actively working with Omise team from **US, UK, Russia and Thailand** to make the integration smooth.

Automation:

- Automation for SSO in both platforms using Playwright with Typescript.
- Building an entire framework from scratch to automate the major release test.
- Converted existing Cypress Framework to Playwright.

ORBITAX

June 2024 - Dec 2025

Software QA Engineer

1.5 Years+

Tested Complex Patented softwares of International Tax Domain:

- **Xatbot** - An **AI powered tax assistant** with queries and co-pilot features related to Tax.
- **Data Collection** - A **complex pipeline system** that facilitates the transfer of data between tools, with or without calculations on the trial balance.
- **Orbitax Drive** - A cloud based storage system based on which entire tax platform works.
- **Questionnaire** - A unique file format developed by Orbitax that not only stores data but also performs calculations on that data.

Automation:

- **API Testing** with **Jmeter**
- **Automated 200+** repetitive test cases using **Playwright** and **Cypress** to ensure quality in 8 Different Servers

Communication:

- Handled major client communications and resolved critical issues for global clients including- **Adobe, Walmart, OpenAI, Nissan, Amazon, Bose, Booking.com, Spotify, Chevron and many more.**

Nagad Ltd

January 2023 - May 2024

Software QA Engineer

1.5 years

- Worked on a complete **system migration** (5 android apps, 3 iOS apps, 3 web portals)
- Tested multiple marketing campaigns worth 5 Million USD (BMW Campaign, Cricstar campaign)
- Utilized expertise in **Mobile Financial Services (MFS), Digital Financial Services (DFS), and payment systems.**
- Automated web applications using **Selenium with JAVA**
- Utilized project management tools such as **JIRA, Zephyr Scale, and Trello**, generating comprehensive reports to facilitate seamless communication and project tracking.
